

THE COMPLETE SOLUTION FOR MANAGING TOLL VIOLATIONS

NEVADA

DO YOU KNOW HOW MANY VEHICLES
EVADE TOLL BOOTHS?
HOW MANY OF THEM **TAMPER**
WITH THEIR LICENSE PLATES?

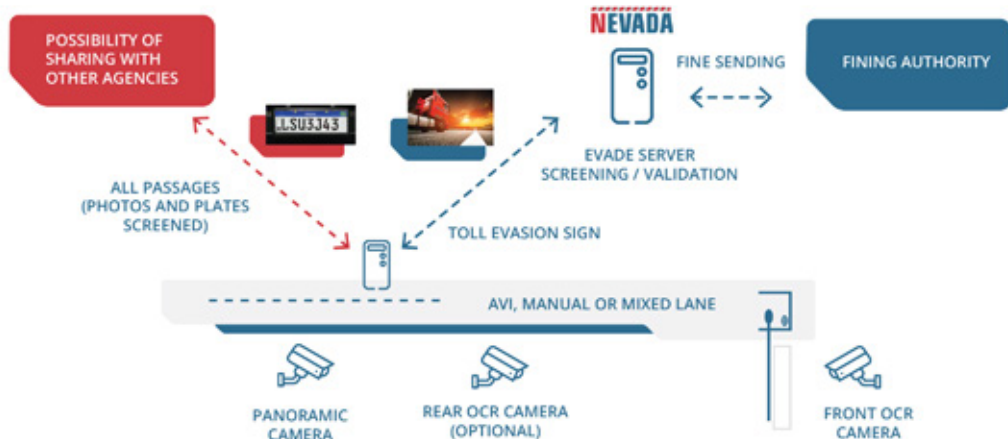

NEVADA is a toll evasion surveillance system that detects, records and stores data and images of all vehicles that pass through without paying.

- Compliant with DENATRAN Ordinance 179
- Approved by INMETRO
- Non-metrological system
- OCR/LPR image processing and analysis
- Allows automatic search in the TAG system

With **high-quality** images and in **great detail**, NEVADA ensures information recording regardless of factors such as speed, ambient lighting, vehicle type and weather.

- High-quality images
- It can be used on manual or automatic lanes
- Automatic search for an existing (or not) valid TAG
- Web system for checking and screening
- It can be linked to multiple public agencies
- Several possibilities: Front, Rear and Panoramic View Camera
- Photo and Video Recording

Reduce over
30% of your evasion
losses with
NEVADA.

Less evasion,
More compliance,
Higher safety.
